Report

Convener's Address

As the students step into their new roles as corporate workers, filled with hope and dreams of scaling new heights, I wish to reiterate the importance of a few things that we have to keep in mind. Students should always think and review – discover the cause and effect of every event, in which they are involved. Do not surrender or become a slave to youthful fancies and indulgences. Be steady in your work. Learn to enjoy hard work – particularly your studies and internship. Think wisely, think systematically. Always prepare yourself for next day's lesson. Be very serious and hardworking in your jobs.

Preserve our heritage and environment for yourself as well as for your next generation. Always be a soldier to defend and preserve our traditions and our territory.

With experienced and dedicated teachers and excellent infrastructure, our college helps students to realize their goals in life. I encourage all students to take advantage of the opportunities provided by the college and involve themselves in all the extracurricular activities that are offered. The overall development of the mind and body is a sign of a healthy and complete development.

Hard work, dedication and perseverance are the most important traits in a person that lead to success. The future belongs to you; your need, therefore, is to prepare yourself for an active participation in the world. This participation demands that you become well informed and hence develop yourself like a pioneer and ultimately grow as responsible men and women.

“We cannot always build the future for our youth, but we can build our youth for the future”. Remember “The reward of every good action will be good only”.

Wishing you all Good Luck.
